

This tree offers a classic Christmas tree silhouette in a lovely deep green, with warm and cosy LEDs.

From across a dimly lit room, this elegant Kingswood Fir looks a lot like the real thing. Especially after a few festive brandies. Its tall, thin design is perfect for small spaces – whether it's up or in storage.

Considering its mid-range price, it does just about everything extremely well. Its branches flex into shape nice and easily, and its “needles” are very well attached – only a few dropped off while we were rearranging its lights (a task not for the faint-hearted as they are quite tightly wound-on).
